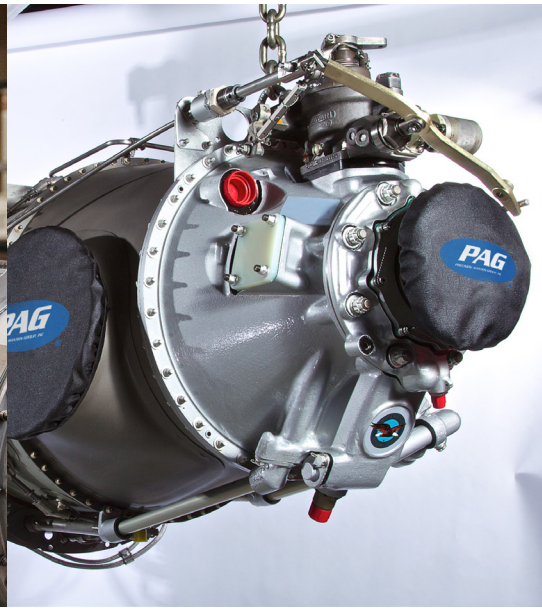
ENGINE SERVICES



PT6 & TPE331 Engine Support

PAG's Prime Turbines Brisbane (PTB) location specializes in PT6A and TPE331 turbine engine Maintenance, Repair and Overhaul (MRO) services.

Expert technicians are dedicated to supporting PAG customers by:

- Providing expert repair and overhaul of PT6A and TPE331 turbine engines.
- Managing engine repair and overhaul at third-party shops on behalf of PAG customers.
- Trading in spare parts for various engines and aircraft including PT6A, PT6T, Arriel 1/2, TPE331, King Air, Twin Otter, Embraer, and Air Tractors.
- Fulfilling long-term engine and aircraft management programs.
- Building service programs tailored to customer needs.
- Coordinating repair/overhaul and trading in various engine and aircraft components and parts.
- Offering short- and long-term rental, leasing and financing of turbine engines and engine components.
- Providing on-site test cell services vs. outsourcing.
- Stocking over 10,000 flight-ready line items and shipping on demand.
