INTUVUE™ RDR-7000 Weather Radar System

AW139 Commercial Helicopters

Weather radar technology in a lightweight, more powerful and easily retrofitted single line replacement unit:

- Provides a comprehensive and accurate perspective across all stages of flight.
- Fully automated and intuitive capabilities increases pilot situational awareness and enhance flight safety.
- Advanced 3D volumetric scanning creates complete, real-time viewing of weather from W0 to 60,000 feet and up to 320nm from the aircraft.

Maritime Surveillance Capability for Rotorcraft:

- Enhanced Search & Rescue and Oil & Gas missions through detection and display of seaborne vessels and structures.
- Advanced surveillance features include Target Overlay, Sea Clutter Reduction, and Sector Scan.
